THE BOARD OF TRADE RETURNS.

THE returns of our over-sea trade for the month of September show that a substantial increase took place in the value of imported commodities, the total reaching £33,111,156, as compared with £30,618,854 in the corresponding month last year, the increase of £2,492,302 being equal to 8·2 per cent. There was also an expansion in the value of our exports, but this was comparatively slight, amounting to only £335,140, or 1·7 per cent. on a total of £19,797,080. The improvement is certainly very small, especially as the month this year contained one working day more than last. On the other hand the weather was very stormy, and the strong gales experienced towards the end of the month may have had the effect of delaying cargoes and so depressing the figures. It has to be borne in mind, too, that September, 1895, showed a gain of £1,862,620 in exports as compared with the same month in 1894, and the fact that so large a total has again been exceeded, even if only by a small amount, may be regarded as an indication that the improvement in our export trade during the last fifteen months is still being maintained. For the nine months of the current year our imports have reached a total value of £316,368,471, being £12,432,757, or 4·1 per cent. in excess of the total for the corresponding period of 1895. The exports of British produce and manufactures in the same period have amounted in value to £180,436,153, as compared with £166,620,437, the increase being £13,815,716, or 8·3 per cent. Re-exports show a further shrinkage, the total for the month being £3,301,511, or £606,325, equal to 15·5 per cent. less than in September, 1895. For the nine months the total is £41,714,276, a falling off of £3,404,567, or 7·5 per cent. as compared with the corresponding period last year. The following tables show the increase or decrease in the principal categories of imports and exports.

Imports of foodstuffs have been on a large scale, the state of affairs in America and the rising prices tending to stimulate shipments. The receipts of wheat, however, were less than in the corresponding month last year, as, though we received 2,381,000 cwts from the United States as compared with 1,931,000 cwts in September, 1895, reduced shipments from other countries brought the total to only 5,026,350 cwts, against 7,307,700 in the corresponding month. Our imports of wheat from Russia fell from 1,874,700 cwts to 852,500 cwts. India sent only 163,000 cwts, against 1,403,900 cwts in September last year, and Argentina 196,100 cwts, as compared with 991,300 cwts. On the other hand, flour, owing to the large quantity received from the United States, shows an increase for the month of 443,000 cwts in quantity, and £150,000, or 24·9 per cent., in value. A substantial expansion is shown also in the receipts of bacon, ham, and fresh beef from the United States, while there was a falling-off in the value of frozen mutton imported from Australasia and Argentina. Sweden, Denmark, and Holland shipped considerably more butter than in the corresponding month of 1895, and during the present year our imports of butter have amounted to 2,301,679 cwts, valued at £11,491,040, as compared with 2,109,916 cwts, valued at £10,434,478 in the nine months of 1895. Germany supplies increasing quantities of her bounty-fed sugar; the total imports of sugar and molasses this year have been £14,171,399, as compared with £13,002,587 in 1895.

Raw materials of all kinds were received in largely augmented quantities last month, the increase being due principally to the activity in shipments from the United States. Thus we received copper of the various kinds to the value of £184,652, as compared with only £49,368 in September, 1895. There was, besides, a small increase from Spain and other countries, making a total excess for the month of £141,000, or 45·0 per cent. The increase in quantity was only 20·5 per cent., as, in spite of the large supplies, stocks have declined and prices have advanced. The total receipts of iron ore were slightly smaller, though more came from Spain, but the total value was greater than in the corresponding month last year. The prominent feature among textiles was the enormous increase in receipts of raw cotton, due to the exceptionally early movement of the American crop. From the United States we received during the month 396,880 cwts, valued at £906,587, as compared with 104,535 cwts, valued at £207,490 in September last year. The value of the total receipts from all countries was £1,104,376, as compared with £361,484, an increase of no less than 205·5 per cent. Values show a much higher percentage of increase than quantities. In fact, the weight of raw cotton imported this year has amounted to only 8,664,002 cwts, as compared with 11,264,902 cwts in the nine months ending September 30, 1895, the falling off of 2,600,700 cwts being equal to 23·1 per cent. The value of the smaller quantity, however, is placed at £20,003,537, against £19,775,305, or an increase of 1·2 per cent. Wool, on the other hand, exhibits the effects of the recent decline in price, as the quantity imported last month was 2,757,000 lbs, or 9·8 per cent., less than in September, 1895, and the falling off of £154,453 in value was equal to 15·6 per cent. The nine months' totals, however, would indicate that the average prices of the year have been rather higher than those of the same period in 1895, the decrease in quantity amounting to 9·9 per cent., while in value it is only 5·4 per cent. Among sundry imports there was again a large increase in the quantity of caoutchouc received, and timber has been coming in freely from all the exporting countries. Imports of tallow were smaller, the quantity received in the month being 97,281 cwts, as compared with 104,500 cwts in September, 1895. In this case the percentages of decrease were 6·9 in quantity and 23·3 in value respectively, while for the nine months there was an increase of 4·3 per cent. in quantity and a decline of 6·0 per cent. in value. A recovery in prices has recently taken place.

The value of manufactures imported in September was £7,062,867, being an increase of £656,323 as compared with the corresponding month last year. A peculiarity of this large increase on the present occasion is that only a small portion of it can be traced to the countries of origin, or even classified as to the description of goods. Just one-half, for instance, is included under the head of "other articles," and of the remainder, £130,000 consists of "unenumerated" iron manufactures, £50,000 of paper and strawboards, the larger supply of the latter coming from Germany, Sweden, Holland, and Belgium, and £42,000 of silk goods, the increase in these coming mainly from "other countries."

Our export trade for the month presents no very marked features, the values under all the principal heads being nearly on a level with those for the corresponding month last year. Cotton exports make a satisfactory exhibit, values especially being considerably higher than

at this time last year. There was a small increase in the quantity of cotton yarn sent out, a falling-off in the shipments to Germany and the Continent generally being offset by increases for China, Japan, and India. The expansion in exports of cotton piece-goods amounted to 32,526,400 yards, equal to 7·8 per cent., while the gain in value was £469,346, or 12·2 per cent. The increase occurred mainly in the shipments to India, China, Japan, Egypt, and Turkey. The value of jute piece-goods was less than last year, the shipments to the United States having fallen from £100,370 to £77,146. Linen piece goods also show a falling off again, due to reduced quantities taken by America. To the same cause may be ascribed the decline in the value of woollen and worsted goods exported; of the former the United States took only 650,200 yards, valued at £60,338, as compared with 1,401,300 yards, valued at £132,993. Of worsted goods, only 1,451,000 yards were shipped to America last month, against 6,539,300 yards in September, 1895, the difference in value being no less than £339,976. For the nine months the comparison is £1,916,423 this year, against £3,659,291 in 1895, the difference of £1,742,868 more than accounting for the total decline in our export of woollen goods this year, which amounts to £1,095,000. Our exports of copper were the only branch of metal manufactures that exhibited a decline for the month, and that was a general decrease among all the countries enumerated, though the most marked shrinkage occurred in the shipments of wrought copper and yellow metal to India. Iron and steel manufactures of all kinds, except tin-plates, show a large increase in value for the month. In the case of railroad iron, a small increase in value is due to higher prices, as the quantity fell from 51,013 tons in September last year to 40,622 tons, or 20·4 per cent. The quantity of railroad material exported this year, however, has exceeded that of the corresponding nine months in 1895 by 236,000 tons in quantity, and £1,293,000 in value, chiefly on account of the increased demand for India, Japan, the Argentine Republic, and Australasia. Our Australian colonies took last month increased quantities of almost every description of iron and steel goods, including bar and angle iron, wire of iron, galvanised sheets, cast and wrought iron and unwrought steel. There was a further heavy decline in the shipments of tin-plates to the United States, the value being only £80,756 as compared with £202,908 in September, 1895, while the decrease for the nine months amounts to about £900,000. The increase of £140,000 in the value of exports of machinery appears in the shipments of locomotives to India and South America, sewing machines to the Continent, and textile machinery to India. A considerable increase is shown in the shipments of apparel to South Africa and Australasia; alkali was smaller in value owing to the lack of demand for the United States; and there was a decrease in the value of fire arms and ammunition exported. The decline in re-exports occurred chiefly in raw cotton for Russia and wool for the United States.
